

## Data Management Solutions

To help you improve laboratory analytical performance, choose from Internet and Desktop software options for participation in the Unity Interlaboratory Program, which helps compare, manage, and interpret QC results.

### Category Products includes:

---

#### **Unity Interlaboratory Program**

The Unity Interlaboratory Program provides reports on the reliability and precision of test systems and helps improve laboratory analytical performance — over 17,000 laboratories participate worldwide

---

#### **QCNet**

A QC portal at [www.QCNet.com](http://www.QCNet.com) providing easy, rapid access to QC data, technical information, and continuing education via the Internet

---

#### **Unity Real Time**

A QC data management tool for regulatory compliance, participation in the Unity Interlaboratory Program, and statistical process control with audit trails

---

#### **Unity Real Time LT**

An entry-level QC desktop data management tool that provides basic QC rules, charts and reports, enables participation in the monthly Unity Interlaboratory Program, and is upgradable to Unity Real Time

---

#### **Unity Real Time online**

A web service-based QC data management tool for regulatory compliance, participation in the Unity Interlaboratory Program, and statistical process control with audit trails

---

#### **UnityWeb**

An entry-level QC web service-based data management tool that provides basic QC rules, charts, and reports, enables participation in the monthly Unity Interlaboratory Program, and is upgradable to Unity Real Time online

---

#### **UnityAlert**

Automatic QC status notification tool to help monitor instrument performance

---

#### **Westgard Advisor**

Automatic QC rules selection engine to improve laboratory test quality

---

#### **Connectivity Solutions**

UnityConnect and WebConnect allow QC data capture from an instrument or LIS
